

LYNX Settings - API Integration

These settings can be found in the "API Integration" area of LYNX's **Configuration - Settings** page.

Filling out these fields is the final step of configuring your [Workday connection](#) or [Ethos connection](#).

Workday

Setting	Notes
Workday API Endpoint	<p>Enter your Workday endpoint information (base URL and tenant ID) into the provided fields.</p> <p>The Workday API Endpoint has a format similar to the following. Note that the base URL (ending in /service) and the tenant ID should be entered in different fields.</p> <pre>https://<workday hostname>.workday.com/ccx/service/<tenant_ID>/</pre>
API Username API Password	Enter credentials for your Workday integration service user.
Term Codes for Auto Initialization	Enter up to three term codes that you want automatically initialized on a recurring basis (time interval is determined by CollegeNET) to keep Workday and 25Live course section data synchronized.
SIS Student Transaction Log Outbound Connector ID	<p>Enter the integration system ID for the Student Transaction Log Outbound Connector. To find this in Workday:</p> <ol style="list-style-type: none">1. Search for "View Integration System"2. Enter Integration System name3. Go to Actions > Integration IDs > View IDs4. Enter the value for "Integration_System_ID" in LYNX
Import Section Registered Head Count	Enabling this setting will allow LYNX to run a custom report in Workday to track registered head count. You must configure this report first for the setting to have an effect.
